

Contacting Residents at Hospitals

UF Health Shands

For patient information: (352) 265-0111

Provide the patient's name. You will be given the patient's room number, and depending upon the patient's condition, you will have one of three results:

- You will be connected directly to the patient's room.
- You will be connected to the nurses' station for the correct floor and the nurse will connect you to the patient's room.
- You will be connected to the correct floor, but the nurse will not connect you to the patient's room. You might also learn whether the patient has been discharged.

To send an e-mail to a patient:

- obtain patient location by calling (352) 265-0111
- Use CareMail website to send e-mail:
<https://ufhealth.org/send-patient-message>

CareMail is active 24/7, but messages are delivered only Monday through Friday. If you send your message by noon Monday through Friday, it will be delivered with the regular mail that same day. Messages are transmitted securely and treated confidentially.
